

## Wetland Herbaceous Vegetation

### **24 *Typha* spp., *Scirpus* spp. Emergent Wetland Complex** **Cattail, Bulrush, Emergent Wetland Complex**

---

Association:

(none; too infrequent to classify)

**Photo Signature Example**

Common species:

*Typha* spp.

*Scirpus* spp.

*Carex* spp.

Project Specifics:

Frequency = 73 total polygons

2 polygons ZION, 71 polygons Environs

Area = 121 total acres

3 acres ZION, 119 acres Environs

Average Size = 2 acres

Description:

This map class is very rare in the project area and only occurs adjacent to man-made water bodies such as stock ponds and canals. This type usually contains many of the same species as the Sedge-Rush Wet Meadow Herbaceous Vegetation Mosaic map class. The vast majority of this type occurs in the environs. The photo signature is bright green, rough in texture, and may have braided streams or standing water.

**Ground Photo**
